Shaping the Dementia Landscape

Shropshire's Dementia Strategy and Action Plan both cover the period 2014-16. In 2015 Healthwatch Shropshire was invited to undertake a piece of work to refresh the Dementia Strategy Action Plan. Working in partnership with the Alzheimer's Society, Help 2 Change, the Memory Service and the Shropshire CCG Healthwatch Shropshire ran a number of focus groups with people living with dementia their carers and service providers at the end of 2015.

This event is an opportunity to listen to the findings from these focus groups and have an opportunity to vote on the key recommendations.

And that's co-production

Working in partnership with communities and patients in each aspect of the decision, including the development of alternatives, and the identification of the preferred solution.

What was the model?

EE 16:54 71%

Back Strategy Document - For Publication(1).pdf

What went well?

- Real co-design across the health economy
- Vibrant enthusiastic groups
- A new support model employing Dementia Companions

What did not go well?

- Some elements excluded (eg Admiral Nurses)
- Lack of detail about how it would all work
- Several aspects very incomplete
- CCG Commissioners very protective
- Insufficient PLWDs and Carers
- Process undermined by stated presumption of lack of resource
- Little use of evidence base during the process

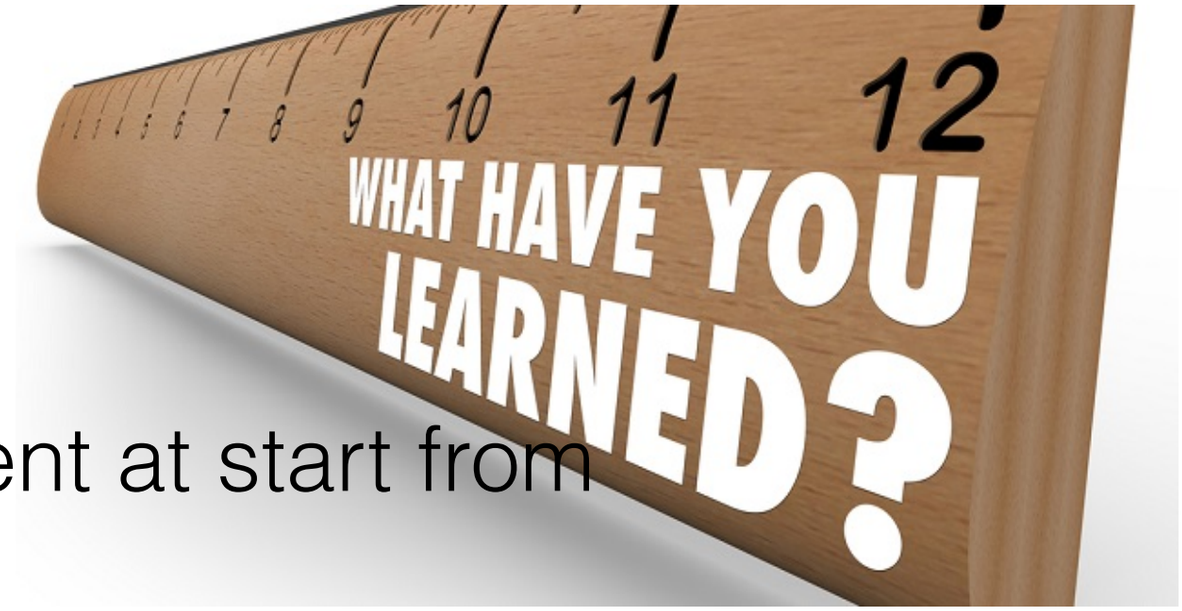
What’s happened since 2016?

- Telford and Wrekin implemented Dementia Companions throughout area
- Shropshire has 2 locality pilots for 18 months

  No Dementia lead commissioner in Shropshire

  No new resources in Shropshire for >3 yrs
- No dying well model
- Very little has changed in Shropshire

Lessons?



- Need resourcing commitment at start from commissioners
- Need more time, more meetings, more research
- Must find the evidence
- Need administrative resource
- Agree ground rules for co-design at start (parity)
- Need a “bank” of PLWDs and carers before you start (eg DEEP)

Good luck!
