Government Transformation Strategy

Published 9 February 2017

Contents

Note
Ministerial foreword
Introduction
Vision and objectives
Business transformation
Grow the right people, skills and culture
Build better tools, processes and governance for civil servants
Make better use of data

Note

This publication has 3 parts:

- the Government Transformation Strategy (this document)
- detail, covering background, vision, scope and objectives, government beyond 2020 and the role of the Government Digital Service (GDS)
- appendices, including case studies, services and data registers that have been and will be delivered

This document sets out the strategy in full. It explains what transformation in government means in 2016 and beyond, and how this work will be done.

Business transformation

Skills and capability

Enabling to deliver

Making better use of data

Shared platforms

Business transformation
